

# PROFILE

FABRICARE Laundromat & Dry cleaning

## WHO ARE WE

FABRICARE is one of the leading Laundromats in Gujarat and has been providing efficient Linen Management solutions by combining its state of the art machinery with a dash of passion and diligence.

## OUR MARKET

Working with some of the best companies across Gujarat, we have quickly stamped our authority by building a bond of trust with our client base. Our diverse client base comes from a wide range of sectors; from corporate to publican spans across industries like hospitality, healthcare, educational and traveling industries.

## ABOUT US

Although laundry sounds very simple, it requires a highly organized and technical approach to maintain an Eco-Friendly laundry concept. We have grown considerably since 2001, with a thorough understanding of our client's needs.

## WHY US

### Hygienic Solutions

Utilizing best case practices from around the globe and implementing them with technological expertise to handle all challenges pertaining to laundry.

### Booming Infrastructure

Managing laundry efficiently by using innovative solutions to meet rigorous hygiene standards.

---

*"We work hard to fully understand your business so that we might find the best design solutions and tailor them to your specific needs and goals."*

---

### Eco-friendly Solutions

Engineering solutions that are focussed on reducing our carbon footprint and staying eco-friendly. This is manifested by the **GPCB certificate** that has been conferred upon us for our adherence to harness ETP & Member of Green Environment.

## GPCB CERTIFIED

FABRICARE is one of the very few companies in the Laundromat sector that is certified by the Gujarat Pollution Control Board (GPCB), in reward for its commitment to adhere to environment friendly solutions.

## OUR INFRASTRUCTURE

### Solar powered boilers:

It is also amongst the very small group of companies, who utilize solar energy to run its laundry related operations. All boilers at our factory harness the power of the Sun.

### Disinfection:

All chemicals and disinfectants ranging from detergent powders; emulsifiers; Industrial salt and Hydrogen peroxide, to Hydrofluoric acid (H.F) Borex; Liq. Ammonia; Softener; Oxalic Acid and Tinopol, are sourced from reputed companies like Hindustan lever & Refnol Chemical, Ciba etc.

### Machine capacity:

We leverage the power of our state of the art machinery that includes boilers for hot water. The infected & stained linens are washed in hot water or in steam generated from the boiler.

## OUR SERVICES

At FABRICARE, we thrive to manage laundries and linen rooms efficiently. We work hard to utilize the best practices from around the world to provide quality washing facilities.

**Collection:** To serve our clients better, we have initiated an added service of collecting the washables from your premises. We strive to provide a complete service package that aims at reducing your workload.

**Washing:** Linens are washed at 60-70°C in the first wash cycle for 15 minutes. The disinfectants are added in the second wash cycle with fresh water for 30 minutes.

**Drying and Ironing:** The wet linens are put into hydro extractors to extract water. Once done, the linens are placed into the dryer & then ironed through a hot head plate press, while the uniforms are pressed manually & packed systematically.

**Prompt Delivery:** We understand how much people love to receive a quick service. Knowing that, we do our best to make all deliveries within 24 hours.

## IN-HOUSE LAUNDRY

We also offer on-site service facilities in case you have a dedicated laundry room in your premises itself. With a dedicated laundry facility, you can expect a high-capacity, high-speed performance that stays within your budget. It's no wonder that health care organizations, hotels and motels, athletic facilities and a wide range of other institutions are realizing lower utility and labor costs while enjoying improved laundry productivity.

## STUDENT LAUNDRY

We also provide an on-campus laundry service to all students residing in a hostel facility. To manage it efficiently, we've been using a thorough tagging system based on student ids through software that allows us to keep tab of which students gave what clothes to ensure nothing gets mixed up. Students even receive an automated email or SMS as soon as their orders get ready.
